

LEAN SOLUTIONS

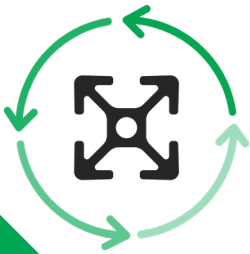

*WHAT DO YOU WANT TO
BUILD TODAY?*

**Manufactured for
Lean Solutions**

TSLOTS IS BUILT FOR LEAN SOLUTIONS

TSLOTS aluminum extrusions along with our competitive variety of components and hardware, make it the perfect option for creating any lean solution! The lightweight and modular design of the t-slotted profiles allow you to design any application to fit your process and reduce waste. The simplistic concept can be reconfigured to fit additional integrations and it's done by the simple turn of hand tools.

“He who stops being better stops being good” - Oliver Cromwell

Continuous Improvement

Continuous improvement is all about reducing unnecessary waste and improving your processes. TSLOTS does just that! With over 120 different profiles and thousands of components, finding the solution to improvement couldn't be easier.

We at TSLOTS strive to find innovative ways to make things easier for you. You have an idea and we don't have a solution? Let us know so we can help you find what you need or the best alternative.

REDUCE WASTE WITH CUSTOM SOLUTIONS!

The one-size-fits all concept will never function the way you truly envision it. This could lead to unnecessary waste in movement, process functions, and valuable floor space. Customizing with TLOTS will help you reduce money spent for future changes.

REDUCE WASTE

Instead, tailor your project to maximize productivity and have it align with your focus on continuous improvement. Combine all of your processes into one to save time and additional costs. For example, building one of TLOTS custom workstations and automation cells helps you align your processes with your continuous improvement goals.

- **Cell Communications**
- **Scheduling Boards**
- **Material Handling Carts**
- **Conveyor Systems**
- **Ergonomic Workstations**
- **FIFO Racks**

BENEFITS OF USING TSLOTS

TSLOTS IS MANUFACTURED WITH LEAN IN MIND

TSLOTS BENEFITS

- ↻ Lightweight
- ↻ Reusable
- ↻ Durable
- ↻ Customizable

The design of the t-slots extrusion is very unique and can be configured for all types of applications. The slots in the profiles allow you to position various applications like vision systems, robotic controls, monitors, sensors, actuators, and conveyor systems in any configuration that would fit your process.

The modular design will also accommodate any future changes or allow you to reuse the extrusions for a different project.

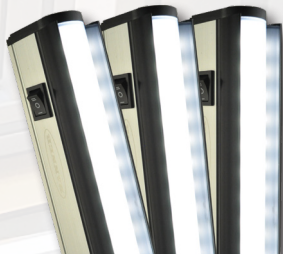

INTEGRATE COMPONENTS

Integrate a variety of our products to increase your productivity, higher efficiency, and prevent fewer process breakdowns.

Customize your workstation with a monitor mount to reduce process movement

Simply mount the LED lights to the t-slot to illuminate a workstation

Add more storage with a drawer. Simply mount slides with the twist of a wrench
