AUTOMATION INDUSTRY
SOLUTIONS

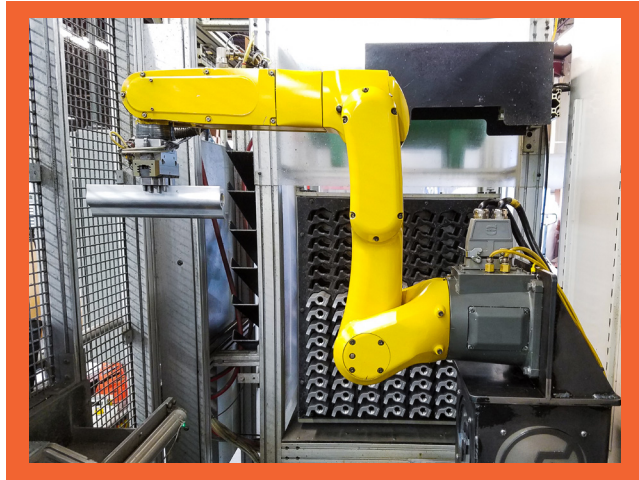

*WHAT DO YOU WANT TO
BUILD TODAY?*

AUTOMATION IN MANUFACTURING

Automation is the future of Manufacturing!

Rapid advances in machine and robotics technology are making learning and integrating automation cells easier than ever, and **TSLOTS** has solutions for you!

Automation allows your production or business to run efficiently with minimal human intervention while increasing production output.

With increasing customer demands, the costs for automation are becoming more affordable, making your ROI achievable, business more efficient, and making you more competitive!

1 LOWER OPERATING COSTS

**AUTOMATION
BENEFITS**

2 REDUCED LEAD TIMES

3 MORE COMPETITIVE

**Automation makes your
company WIN!**

4 FASTER R.O.I.

5 INCREASED PRODUCTION OUTPUT

6 IMPROVED PRODUCT QUALITY

7 MACHINE EFFICIENCY

8 LOWER INVENTORY AND OVERHEAD

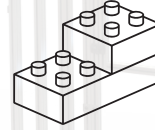

BENEFITS OF TSLOTS IN AUTOMATION

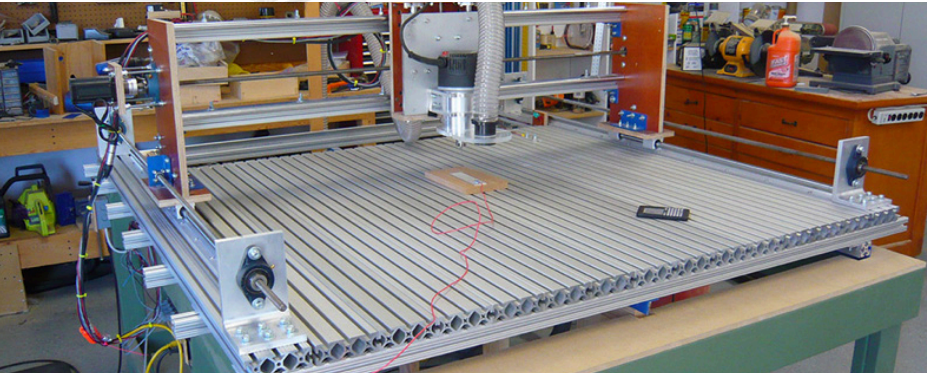

In automation, customization is key to everything. TSLOTS can be used to create any structure or frame for various automation systems. The versatility of the extrusions make TSLOTS the best solution.

Whether you are using actuators, safety control switches, sensors, valves, light bars, or vision systems the slot design in our profiles allow you to attach these products in various positions.

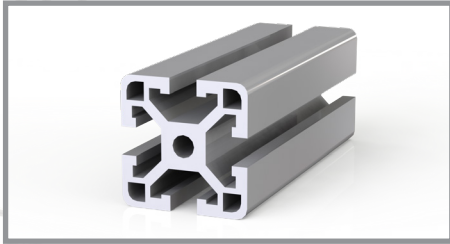

When your project or system needs adjusting, the modularity of TSLOTS allows you to do so without adding new equipment. Quick changes are more efficient causing less downtime and increased productivity.

Automation is the key to unlock your business' potential!

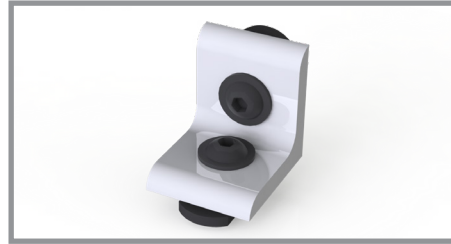

BENEFITS OF TSLOTS IN AUTOMATION

TSLOTS extrusions come directly from us, the extruder! We are the only extruder to supply t-slotted extrusions directly to market.

This allows us to provide consistent high quality extrusions and inventory levels along with the competitive pricing you need. We are able to provide the product you need for your automation project, on time and accurate.

Aluminum extrusions are lightweight, easy to use, and carry high strength properties for the toughest and most rigid applications, making this ideal for automation solutions.

No matter the environment, TSLOTS will be able to withstand its surroundings while looking great!

Have a specific idea in mind for your project?

TSLOTS has one of the most extensive product offerings for extrusions and components. Our large offering allows you to customize the way you want! If you find something we don't offer, let us know. As the manufacturer, we are able to use our resources to get what you need!

SAFETY IN MANUFACTURING

SAFETY

Safety with TSLOTS is one of our utmost important priorities. Our amazing team can assist you in giving insight on what solution may work best for you and within the proper regulations of OSHA or your own policies, TSLOTS will accommodate your needs.

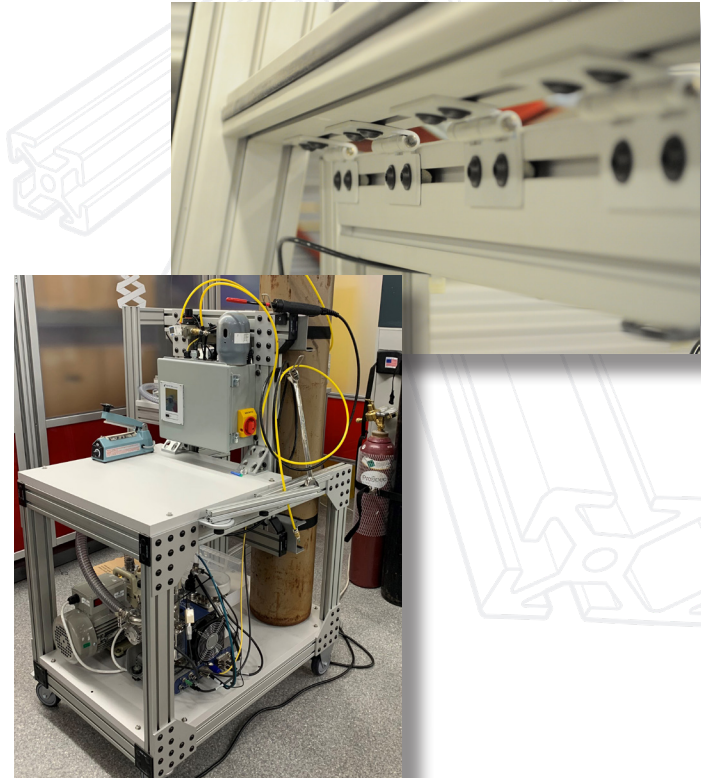

When planning your projects, be sure to check with OSHA or your company regulations to understand what will be required.

COMPATABILITY

Compatibility is a big deal, we know. That's why we've made it a point to ensure all of our aluminum extrusion and hardware products are compatible with all the other major suppliers.

If you have any existing guarding or frames that needs to be updated, we can help. With our profiles being compatible with others, you can add a new TSLOTS profile to your project and you will not have to worry about fit or function.

We are focused on making things as simple as possible for you so you spend more time being efficient and productive so you can unlock your business' potential!
